

## OSMO Hard Wax Oil Maintenance

### **DRY CLEANING**

An oiled wooden floor repels dirt. In contrast to many other types of flooring, it does not charge up electro-statically and does not offer breeding grounds for microbes and allergens. Dust, lint or animal hair can be removed with a vacuum cleaner or broom. Cleaning is even easier with the Osmo Opti-Set. The green mop is especially developed for dry cleaning.

- Quick, quiet and economical: dry cleaning with the Dust-Mop.
- Osmo Opti-Set contains a Mop with a Telescopic Handle, a Dust-Mop, a Micro-Mop Plush and an Active- Fibre Cloth.

## **REGULAR DAMP MOPPING**

How often your wooden flooring has to be mopped depends on the amount of use. In private households, a weekly cleaning routine is normally enough, in restaurants and other high traffic areas you should mop daily.

- Ideal for the quick and partial cleaning in between.
- As an alternative, use the white Micro-Mop Plush from the Osmo Opti-Set.
- A dash of Osmo Wash and Care in mop water removes everyday dirt and grime exceptionally, and thanks to the natural oils, it prevents the floor from drying out. Avoid using aggressive all-purpose cleaners.
- NOTE: Only use a damp - not wet - mop! When required, dry afterwards.

## **INTENSIVE CLEANING AND REFRESHING**

From time to time, your wooden flooring needs to be refreshed. In private households, refreshing is normally needed first after months. Osmo Liquid Wax Cleaner is ideal for this. That way the protective oil-wax layer is regenerated and your floor retains that special shine. In high traffic areas of restaurants and shops, Osmo Maintenance Oil should be used. This was especially developed for this application. Here regular refreshing can be sensible. Cleaning intervals depend on the amount of use.

- Osmo Liquid Wax Cleaner cleans and regenerates in one step
- Osmo Maintenance Oil regenerates without forming a layer, special for public spaces
- For white oiled floors: Liquid Wax Cleaner or Maintenance Oil in White Transparent
- For larger areas, we recommend the floor cleaning machine FloorXcenter.

## MAINTAINING AND RE-OILING

Sometimes life can leave marks, even on optimally maintained wooden flooring. No problem. That is why for an oiled wooden floor, the protective surface can be renewed at any time, without needing to sand the old finish. This is a huge advantage compared to lacquered wooden surfaces.

- Clean floors thoroughly beforehand.
- Manual application: apply an extremely thin layer of Osmo Polyx®-Oil with the Floor Brush or with the Osmo Microfibre Roller.
- Machine application: Osmo FloorXcenter for intensive cleaning and for applying Polyx®-Oils.
